SUMMARY

Enthusiastic Mobile Application Developer proficient in Flutter, committed to developing innovative and user-centric mobile apps. By merging technical skills with creativity, I work collaboratively with teams to deliver impactful solutions. Constantly eager to learn and evolve, my goal is to enhance company achievements through state-of-the-art app development.

SKILLS

Technical Skills	Flutter - Android - iOS - Dart - REST APIs - GitHub - Firebase - Provider - GetX- Google Maps
Soft Skills	Problem Solving - Teamwork - Flexibility - Creativity - Time Management

EDUCATION

2023	Bachelor's in Computer Science at The University of Lahore (UOL)	(GPA: 3.2/4.0)
2019	Intermediate in ICS at Govt. College for Women	75%

WORK EXPERIENCE - 3 YEARS

Mobile Application Developer - Codexia Technologies	November 2025 - Present
Accomplished Flutter developer with a specialization in mobile app development, focusing on implementing MVVM architecture for streamlined and effective code.	
Mobile Application Developer - SOLUTION SOUL	Jul 2023 - November 2025
Specialized Flutter developer with extensive experience in mobile app development, emphasizing the use of MVVM architecture for efficient and clean code.	
Mobile Application Developer - SYNTHGLIDE (Remote)	Aug 2023 - September 2024
Accomplished Flutter developer with a specialization in mobile app development, focusing on implementing MVVM architecture for streamlined and effective code.	

PROJECTS

Aigent-PA

Built a cross-platform Flutter app that allows users to manage reminders, meetings, and events with real-time syncing. The app also includes mood tracking, personal notes, diary entries, and automated birthday notifications.

Temp Haus

Developed a dual-role platform for dentists and users, enabling appointment booking on weekly or monthly plans. Implemented job application features for dentists and automated shift completion with receipt generation.

Mindsript

Developed a dynamic content creation platform with modules for podcast audio, video, and script uploads. Enabled user engagement through viewing and rating features, with a Flutter Web admin panel and Firebase backend for scalable management.

WhereToEat

Developed a dual-app platform for users and restaurants, enabling discovery, ratings, and location-based search. Integrated Firebase backend and Maps APIs to support real-time data and nearby restaurant services.

Whiskey App

Developed a multi-app whisky delivery platform with dedicated apps for users, drivers, and shops. Enabled order management, delivery tracking, and inventory control, supported by a web-based admin panel for seamless operations.

Pay Back

Spearheaded the development of the Payback App, improving user engagement through features like friend management, profile customization, and real-time one-to-one chat. Implemented group creation and management with integrated group chat for seamless collaboration.

Mobile Octane

Contributed to the development of Mobile Octane, an innovative refueling app streamlining fuel access for vehicle owners. Worked on both Admin and User modules, participating in design, development, and deployment phases.

On Demand

Led development of a two-tier mobile app (user/driver) and Flutter Web admin panel. Implemented features including profile management, job creation, scheduling, and real-time chat using Firebase, Firestore, and Firebase Authentication. Integrated FCM for push notifications and location-based job assignments.
